# WOODEN Series

ALUMINIUM COMPOSITE PANEL  
Building Facades

Plywood Is A Material (wood) Manufactured From Thin Layers Or “plies” Of Wood Veneer That Are Glued Together With Adjacent Layers Having Their Wood Grain Rotated Up To 90 Degrees To One Another. In The Most Basic Of Terms, Plywood Is Made By Combining Wood Veneers Together In Order To Create A Flat Sheet.

NATURAL WOOD

## The Benefits Of Using Wood

- Renewable, Recyclable, Natural. Timber Is One Of The Few Natural,
- Renewable Building Materials. ...
- Carbon Positive. ...
- Low Energy Production. ...
- Health And Wellbeing. ...
- Fire Performance. ...
- Natural Insulation.

**Appearance Of Wood.**  
**It Is Characterized By The Following Properties:**

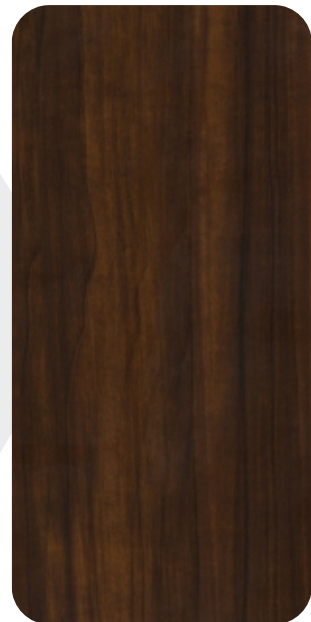

- Color, Gloss, Texture And Macro structure. Under The Color Of Wood Is Understood A Certain Visual Sensation, Which Depends, In The Main, On The Spectral Composition Of The Light Flux Reflected By It.
- Wood Is Therefore A Light-weight Building Material With Excellent Technical Characteristics. In Spite Of Its Low Weight, Wood Offers High Tensile And Pressure Resistance And It Is Resilient To Weathering When It Is Used Correctly.

## The Benefits Of Using Embossing

- Creates A 3d Design That Pops From Surface.
- Easier To Apply Foil Stamping To An Embossed Design.
- Can Hold Finer Detail Than Debossing.
- Better For Custom Stationery, Business Cards, And Other Paper Promotional Products.

### The Benefits Of Using Marble

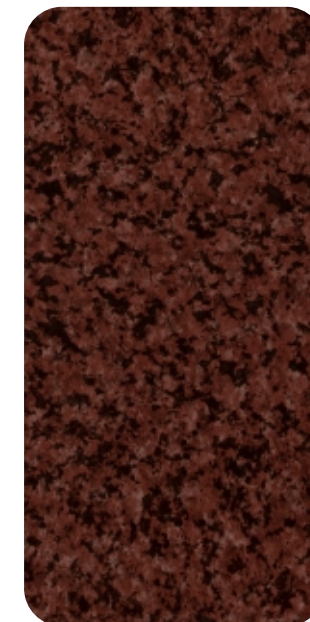

- Work Smooth & Easy: ...
- Do It For The Aesthetics: ...
- Make Your Building Fire-safe: ...
- Safeguard The Property From Harsh Weather & Dust: ...
- Recycle For A Greener Tomorrow:

## WE ARE

ARECA exterior grade aluminum composite ranges, are available in 50 colors solid, metallic, wooden and marble finish i.e ARECA SILVER, ARECA PLATINUM, ARECA PARTITION PANEL. The product is very durable and come with warranty of more then 10 years. We also provide custom made colors as per your specification. However, for a custom made color sufficient time may needed to deliver the request made (Approx, 40 day from the date of receipt of purchase order and a minimum quantity of 15,000 sq. ft.)

## APPLICATIONS

Exteriors of multistoried Apartment I curtain Wall I Industrial & commercial Constructions I Column / Beam Cover Partitions I canopies I Elevators I Signboards I Kitchen Units I Display Units I Spandrel panels I Fall Ceiling

## STANDARD DIMENSIONS

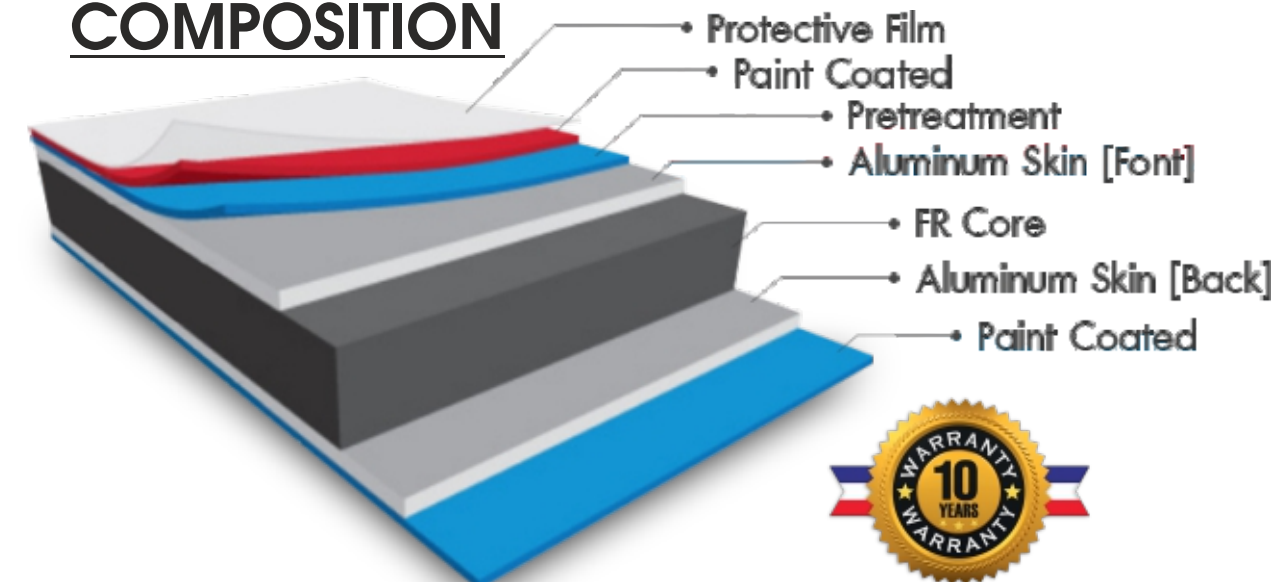

Thickness: 2mm, 3mm, 4mm, 5mm. Special Thickness & Lengths Available as per the requirement  
Standard Size: 1220mmx2440mm I 1220mmx3050mm I 1220mmx3660mm In addition to this, We can also provide APP (Aluminum Partition Panel)

## SALIENT FEATURE

Ultra modern Outlook I Sound & Thermal resistant I Give Longer Life to building I Easily bendable I Minimum dead weight I Value addition to building I Even & Unique colors I Smoother Faster Installation I Water & Corrosion resistant I 100% maintenance free I High strength & rigidity I Excellent flat surface

**Kindly Notice :** Sample in the color chart may actual color & aluminum thickness, Please ask for sample. To avoid possible reflection differences, it is recommended to install the panel in same direction as marked on the protective peel-off film.
